

NOTES FOR EXERCISES IN SESSION 2

- 2:7; 3:4,10; 2:67; 3:14,40,95; x:3 (2:69; 3:18,19,52,94),
- note: recommended order! — also many extras if you want to practice a specific type of question,
- catch-up/left-over from first lab: 1:65,72; x:1.

Outline of lab session:

- review of random selection (2L–8), incl. Minitab demo,¹
- very brief review of surveys and sampling (2L–11/12/14); read on your own,
- individual work on the exercises.

Notes for specific exercises:

- 2.7, 3.14, 3.40: data files on h-drive (and solutions page),
- 2.67, 2.69: replace “correlation” by association,
- 3.10, 3.14, 3.40: alternatives to using Table B/A:
 - * the Simple Random Sample applet,
 - * Minitab/Stata/R,try all methods for 3.14; then use your preferred method,
- 3.52: solution + extra question in lecture notes (2L–13).

¹ Stata: use `sample` command and `uniform()` function; R: use `sample` and `runif` functions.
